Air Lab Werks Model CID150 In-duct Air Purifier

Made in USA

CID150B

CID150

According to the EPA, the air inside your house, condominium, mobile home, small office, apartment, retail space etc. may be up to 10 times more polluted than the air outside. Dramatically improve the air you and your family breathe with Air Lab Werks new model CID150 In-duct Air Purifier. Designed for spaces up to 3500 square feet, this "mini" version of our ID-100 is ideal for reducing/eliminating: mold, mildew, bacteria, yeasts, protozoa, viruses within the ducts...even odors and gases in some models.

The unique design of this product allows the user to select from one of four different lamp designs, each with unique air cleaning/purifying capabilities. The exclusive ALW electronic ballast ensures outstanding lamp performance as well as extended lamp life.

For areas up to 2500 square feet:

CID150-UVC6: Ultra violet for mold, mildew, bacteria, yeasts, protozoa, and virus control

CID150-8020: UV/ O3 tri-oxygen combination lamp for light or no odor loads + mold/mildew control

CID150-6040: UV/ O3 tri-oxygen combination lamp for heavier odor loads + mold/mildew control

For areas up to 3500 square feet:

CID150B-C6040: UV/ O3 tri-oxygen combination lamp for larger homes and commercial applications.

The end user selects the model appropriate for his/her cleaning requirements based upon simple variables such as square footage of space where cleaning is required and odor/gas/mold levels. Simple to install and use, the CID150 requires only a lamp replacement one time per year so it is easy to maintain and very inexpensive to operate...only pennies per day!

For information regarding our more powerful in-duct units and portable models, please consult your local distributor.

SPECIFICATIONS:

- Long life solid state electronic ballast
- Compact size designed to fit in small spaces
- Low maintenance
- Low wattage, custom air purification lamp
- 120 v plug and cord standard
- Easy to install
- All metal enclosure
- Automatic operation
- Purification output light
- Dimensions: (Cabinet) 4 5/8" x 4" x 2"
- Duct opening: 1 1/2" diameter

ADDRESSES:

- Diaper pail odors
- Smoke odors/gases
- Pet odors
- Cleaning products
- Mold/mildew
- Musty basements
- Hair care products
- Cooking Odors

WARRANTY: manufacturer warrants equipment (less lamps) against defects in parts and workmanship for **THREE** full years from the date of purchase.
