

Air Lab Werks Model ID100 In-duct Air Purifier

According to the EPA, the air inside your office, store, home, etc. may be up to 10 times more polluted than the air outside. Dramatically improve the air you, your family, co-workers and customers breathe with Air Lab Werks new model ID100 in-duct Air Purifier.

The unique design of this product allows the user to select from one of eight different lamp designs, each with unique air cleaning/purifying capabilities. Models available:

- ID100-UVC6/UVC8/UVC14.: Ultra violet for mold mildew, bacteria, yeasts, protozoa, and virus control
- ID100-OX: O3 tri-oxygen for removal of gases and odors in areas with heavy odor loads
- ID100-5050: O3 tri-oxygen/UV combination lamp for moderate odor loads plus mold/mildew control
- ID100-6040: O3 tri-oxygen/UV combination lamp for light odor loads plus mold/mildew control
- ID100-8020: O3 tri-oxygen/UV combination lamp for maintenance level odor and mold control
- IDC100-6040: Commercial grade O3 tri-oxygen / UV combination lamp

The user selects the model appropriate for his/her cleaning requirements based upon simple variables such as square footage of space where cleaning is required and odor/gas/mold levels. Simple to install and use, the ID100 requires only a lamp replacement one time per year so it is easy to maintain and very inexpensive to operate...only pennies per day!
